8	23459	Axle Clamping Bar Left	1
9	23460	Adjusting Screw	1
10	23461	Axle Clamping Bar Right	1

IMPORTANT

For most efficient suction power, simply place this tool on a level surface while the vacuum is switched on. Raise or lower the wheels by turning the No. 9 adjustment screw. Turn counter clockwise until a hissing sound can be heard. This indicates that the tool is properly adjusted for most efficient vacuuming. For wet pick-up lower the rubber blades by approximately half a turn extra.
